What was the most challenging piece of this assignment? Did you find it easy or challenging to work with HTML and CSS? How long did this overall assignment take you?

- The most challenging piece of the assignment for me was the linking of all the webpages to the index.html file and getting to understand the how the alignment of images that I was using for the website worked
- In my opinion, it's easy to understand how HTML and CSS come together to create the webpages, but the dynamic usage to add more creativity in the layout needs a lot more practice and experimentation

What decisions did you make when you made your site mobile friendly?

- To make the site mobile friendly, I had to write different media queries for different sizes to ensure the navbar was responsive enough to fit the other contents of the page consistently
- This had to be done for all the pages of the website manually

What did you take into account when you developed the *design* of your website? Is there anything that you're particularly proud of?

- My personal idea behind the website was to be a minimalist in design and focused on displaying the content as simply as possible without too much clutter; simple one-liner explanation that well-highlighted and quick to read
- In choosing the color schemes and fonts were deliberately chosen to be easy on the eyes with a dark background and the content being highlighted in lighter color

Given more time or resources, what additional features would you add to your site in the future?

- In my personal view, I would replace the text-heavy home page and a slide show of creatives to depict my professional and personal skills/attitude
- Find better quality images/ideas to showcase my work and interest

How many hours did you spend on this assignment?

- I spent over 30+ hours on this assignment

If you used code or design from somewhere online, please mention it here

- I have used code ideas from w3schools.com, stackoverflow.com & medium.com
- Google fonts: https://fonts.google.com/specimen/Lato?preview.text=Sheetal%20Turaga&preview.text_type=custom&width=6&stylecount=8
